

croclipig

Croclipig

The croclipig is a very dangerous fantastic beast what lives in the Atlantis. The beast eats 500kg fish in on day. Because the croclipig eats so much, it can not fly so fast. Therefore the animal is a very good and fast swimmer in the water. The croclipig has fins like a mermaid and a tail like a pig. It has also paws from a big lion, wings from a dragon and a head like a crocodile. But it isn't as beautiful as a monkey. In fact it is very ugly. The croclipig is after a whale the biggest animal in Atlantis with a length of 33 meters. People don't see the animal very often because it lives very deep in the water.
