

The Unifish

The Unifish was one of the animals in Atlantis. Its length was about two metres. Its fin was three metres long but the horn was only 50 centimetres. It weighed one ton like a little elephant. Its head was very colourful. The mane and the horn had the same colours as a rainbow. Because its favourite food was soap bubbles. Its fur was as white as snow. The tongue was pink like a chewing gum. It had the body of a fish. Its scales glittered. They were silver and golden. The Unifish was the fastest and most elegant animal in the sea. All the young mermaids loved this beautiful Unifish. When they played together, they sat on the Unifish's fin and they had a lot of fun.
