

The Sealionhorse

The Sealionhorse was an animal that lived on land and in the sea. It looked like a horse with a lion's mane. The Sealionhorse had ~~pony~~ ears like a pony and big paws. The tail was very long and pink. The Sealionhorse could fly with his long wings and swim. It was very friendly and all the people loved it but the monkeys were scared because of his paws. The favourite food of the Sealionhorse was grass, shells and mice. Sealionhorses could grow to a length of 3 meters and some became 9 meters. He liked to play all the time. It loved to swim in the sea at night and during the day it slept on a stone. It was one of the most beautiful animals of Atlantis because of his fur and his colours.

PS: It was a mammal.
